1. The total credits required for graduation are 128 credits (University Compulsory Courses: 28 credits + College Compulsory Courses: 9 credits + Program Compulsory Courses: 46 credits + Program Elective Courses: at least 45 credits). General Education Courses, including Core General Education and Multidisciplinary Elective Courses, total 22 credits and must be completed in accordance with the "Regulations for General Education Courses for Freshmen Admitted from 2023." Program elective credits must include 9 to 27 credits from external departments (credits from courses not offered by the 'Bachelor Program in Applied Foreign Languages and Smart Commerce' are considered external credits). If the names of external courses are identical to those offered within this program, they may also be counted toward the program elective credits.

2. Python certificate is the graduation threshold in order to graduate from this program. Those who do not have the certificate before graduation need to take and complete a 3-credit course titled "Problem Solving and Programming Skills".

3. Students wishing to waive the above-listed English courses must submit an application to the offering department at the beginning of each semester, in accordance with the"Policy for Waiving Certain English Courses in the Bachelor Program in Applied Foreign Languages and Smart Commerce. " Approval is required for the waiver to be granted.

4. "Graduation Project I" and "Graduation Project II" are compulsory courses focused on innovation and creativity.

5. To graduate, students must fulfill the following requirements: (1) "CHU Regulations for Basic Competence Indicators for International College of Humanities, Social Sciences and Smart Commerce"; (2) "CHU Regulations for Basic Competence Indicators for Bachelor Program in Applied Foreign Languages and Smart Commerce.". For details, please refer to the program webpage.

6. The above course information is subject to the actual course offerings in each semester.
